Asbestos Management Plan

There were no significant changes noted during our last review.

No significant changes were noted during the 2018 surveillance of the campus. All remaining asbestos materials in our buildings are in satisfactory condition. We plan to continue to manage them in place and also remove and dispose of when appropriate, in accordance with all applicable laws and regulations.

The inspection findings and asbestos management plan are on file in the Office of the Director of Campus Safety and Security and are available for review during normal school hours. For more information, please contact the Security Director, Jim Pollack, at 703-556-8237.
